

OSWEGO HIGH SCHOOLS

OSWEGO, ILLINOIS

Oswego High School

Oswego East High School

Project Profile

MeritCorp analyzed existing site infrastructure for each facility to determine construction costs related to potential expansion of existing facilities up to 3,200 students per high school.

Project scope included meeting with district officials and two architectural teams, developed concept plans for student/staff/ bus parking and stormwater management. MeritCorp also provided conceptual designs of sanitary sewer, storm sewer and watermain utilities that need to be relocated due to building expansions, prepared cost estimates for all site civil activities for both high schools.

Upon completion of analysis, due diligence and design, MeritCorp presented concept plans and cost estimates to district staff and the board of education.
